

Welcome to My Future!

This project is designed to help raise aspirations and inspire children about future career opportunities.

Your child had a virtual visit from people in jobs that work in a variety of fields that fall under the clue 'Bright Spark'

They explained what they do in their job and why they enjoy it.

Activities for children

Talk to your children about the jobs they learnt about. You might create a fact file, design a PowerPoint or just talk...

- ❖ Which job did you like best?
- ❖ Who was your favourite professional?
- ❖ How many jobs can you think of that involve catching of some sort?
- ❖ What skills do you think you would need?
- ❖ Do you use some of those skills already at home or school?
- ❖ What do you love doing that you could use in a future career?

essential skills

2025-26

Using imagination and generating new ideas

Creativity is about how learners create new ideas and possibilities in a wide range of settings and is the complement to problem solving.

The first few steps focus on the ability to share different possibilities, share and express them, and create ideas when given a simple prompt.

The focus is then on applying creativity to suggest improvements, combine concepts, identify opportunities for innovation, and develop success criteria.

Transmitting information or ideas

This skill is about how learners transmit information and ideas to others.

Initially, learners communicate clearly with individuals they know, in small groups, and then with new people while organising points to be understood.

Next, learners communicate effectively by thinking about what their audience already knows, choosing appropriate language, tone, expression and gesture, and bringing in facts appropriately.

Suggested activities to try at home to build the skill: Creativity

For older children

Fashion designer. Choose a theme, then create designs for a new outfit. The clothes could be inspired by some existing designs that you then adapt or could be completely new. Draw illustrations or create designs on the computer and talk about them to others at home.

Games Designer. Create a storyboard or play for a brand-new computer game. Think about an existing game you enjoy then change the characters, setting and/or challenge to make it new. Talk about your ideas with someone at home.

Suggested activities to try at home to build the skill Speaking:

For older children

Plan a presentation about a hobby or interest. This might be about a computer game, a sport or a style of music. Ask questions to extend the conversation. Put on a show for the family.

Organise a short show to run over a video call or in person to entertain family members. It could include a song, magic trick or a presentation. Introduce the show clearly so the family knows what to expect.
