Welcome to My Future!

This project is designed to help raise aspirations and inspire children about future career opportunities.

Your child had a virtual visit from people in jobs that work in a variety of fields that fall under the clue ‘Can we fix it?.

They explained what they do in their job and why they enjoy it.

Activities for children

You might draw a picture, do some writing or just talk…

- *Which job did you like best?*
- *Who was your favourite volunteer?*
- *How many jobs can you think of that work within the area ‘Can we fix it?’?*

PLANNING

Setting goals and designing routes to achieve them
This skill is about how individuals develop clear, tangible goals and robust routes to achieving them – whether in education, the workplace or their wider lives.

Initially, this is about considering the difficulty of tasks, knowing what doing well looks like for them, working with care, and recognising their strengths.

The focus is then on taking a positive approach to new challenges, setting achievable goals, developing simple plans, and prioritising tasks.

Suggested activities to try at home to build the skill Planning:

For younger children
Pick up Peas. Set your child a challenge to pick up as many peas or beans as they can with a set of chopsticks or tweezers. Have a go with them. Talk about if it is too difficult or if it is easy to do.

Set yourself a balancing challenge. You will need to decide what or how you will balance and for how long. It could be standing on one leg, balancing a book on your head or balancing a ball on your nose! Make sure it is a safe challenge, but it needs to be tricky!
