Welcome to My Future!

This project is designed to help raise aspirations and inspire children about future career opportunities.

Your child had a virtual visit from people in jobs that work in a variety of fields that fall under the clue ‘Can we fix it?’

They explained what they do in their job and why they enjoy it.

Activities for children

Talk to your children about the jobs they learnt about. You might create a fact file, design a PowerPoint or just talk…

- Which job did you like best?
- Who was your favourite professional?
- How many jobs can you think of that involve catching of some sort?
- What skills do you think you would need?
- Do you use some of those skills already at home or school?
- What do you love doing that you could use in a future career?

PLANNING

Setting goals and designing routes to achieve them
This skill is about how individuals develop clear, tangible goals and robust routes to achieving them – whether in education, the workplace or their wider lives.

Initially, this is about considering the difficulty of tasks, knowing what doing well looks like for them, working with care, and recognising their strengths.

The focus is then on taking a positive approach to new challenges, setting achievable goals, developing simple plans, and prioritising tasks.

Suggested activities to try at home to build the skill of Planning:

For older children
Consider the problem: A village has a river flowing through it. Villagers need a bridge to get across the river. Draw a sketch of a bridge design. Use junk-modelling to build a model of the bridge.

Consider the problem: How can we improve the environment? Research to find out more about this problem. Create 3 solutions you could do at home or locally to address this problem. Write or sketch to show how your proposed solutions might help solve the problem, then share this with your household.
